DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-9, drawn to A process for producing powder coating materials.

Group 2, claim(s) 10-24, drawn to a Taylor reactor.

2. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: WO 00/00280 (Moritz) teaches a Taylor Reactor having the claimed features in applicant claim 10:

The invention relates to a Taylor reactor for materials conversion, comprising an outer reactor wall (1) and a rotor (2) concentrically or eccentrically arranged therein, a reactor bottom (3), a reactor lid (4) defining together the annular gap-shaped reactor volume (5), at least one device (6) for dosing educts, in addition to a device (7) for product evacuation, wherein a change in viscosity ν of the reaction medium occurs during materials conversion and the reactor wall (1) and/or rotor (2) are geometrically embodied in such a way that conditions for Taylor vortex flow are fulfilled in the reactor volume substantially in the entire reactor facility.

- 3.
4. Where there is an inlet region (6), an outlet (7), a homogenizing means (2). The product is discharged through the outlet (7). For this reason the Taylor Reactor of claim 10 cannot be considered an inventive concept.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1791

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. A telephone call was made to Anne Sabourin on 16 January, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID N. BROWN II whose telephone number is (571)270-5497. The examiner can normally be reached on Monday-Thursday 7:30a-5:00p EST.
